Firehawk

"The Last Pontiac Muscle Car..."

...from SLP™

Own a piece of automotive history by purchasing one of the last Pontiac muscle cars!

Firehawk is available through Pontiac dealerships nationwide. The 2009 385 HP Firehawk offers the all-around performance, handling and head-turning styling true to its distinctive nameplate.

Firehawk Appearance

OEM-Quality Badges

The chrome badging on the Firehawk is designed to be very subtle. Four OEM-quality Firehawk badges are included for the deck lid, both front doors, and under the hood on the cold-air induction lid.

19" 5-Spoke Wheels with Firehawk Centercaps

The Firehawk 19" x 8" 5-spoke alloy wheels have a gun metal finish with a machined spoke face. They have a clear coat finish over the entire outside surface of the wheel to create a unique look that will be recognized by all. The center cap features the Firehawk logo.

Firehawk Car Cover

To protect the finish of your Firehawk, each vehicle includes a silver fabric car cover that reflects the sunlight and helps protect it from the elements and against harmful UV rays. Each cover includes the distinctive Firehawk logo silkscreened up front, a locking cable, and a tote bag.

Floor Mats

Every Firehawk comes with a set of premium quality front floor mats with the Firehawk logo embroidered on both mats.

Portfolio, Owner's Manual Supplement, and Duplicate Window Sticker

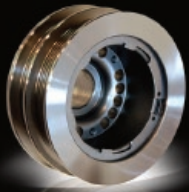

A leather bound, commemorative Firehawk portfolio comes with each vehicle. It includes a Firehawk pen, tire tread depth gauge, owner's manual supplement and a duplicate window sticker.

Firehawk Performance

PowerFlo® Dual Exhaust System

The axle-back exhaust system was designed and tuned specifically for our new Firehawk. The system features 304 polished stainless steel mufflers and uniquely shaped exhaust tips that fit the factory rear fascia openings, along with mandrel bent stainless steel pipes.

25% Underdrive Pulley/ Harmonic Balancer

Firehawk's unique Underdrive Pulley/Harmonic Balancer reduces engine accessory (water pump & alternator) drive speed by 25%, contributing to the engine's 385 HP output.

Bridgestone Potenza RE050A *Pole Position* Tires†

The Potenza RE050A Pole Position tire comes loaded with race-inspired technology: UNI-T for outstanding wet and dry traction, a tread pattern that promotes rapid water evacuation, variable dimensions in the tread blocks, and a smooth shape to reduce noise. An asymmetrical pattern in the RE050A Pole Position tread increases surface contact to enhance acceleration and cornering.

+Note The base G8 GT includes the optional 19" factory wheels and Bridgestone Potenza RE050A tires, when ordered with Pontiac's PDX Sport Package. If the G8 GT is not ordered with the Sport Package, SLP supplies the specified tires at an additional cost. During final assembly, the tires are then mounted and balanced on the Firehawk wheels and installed on the vehicle.

Blackwing® Cold-Air Induction System

The Blackwing® Cold-Air Induction System replaces the restrictive, power robbing factory air filter assembly. By picking up cool, dense outside air, and pumping it directly into the engine, this system provides a noticeable power gain. The system includes an OEM-quality black-finished polypropylene high-flow intake tube and black powder coated heat shield, along with a high-flow reusable Blackwing® filter.

Custom Tuned PCM Program

Firehawk's Performance-Optimized PCM Reprogrammer is a dynamometer-developed, non-adjustable tuning upgrade that enables the L76 V8 engine to provide maximum horsepower and torque increases, while maintaining the excellent driveability of this great car.

Sport Suspension Package *Optional

SLP's Optional Sport Suspension Package is specially tuned and engineered for the new 2009 G8 GT-based Firehawk. By lowering the chassis 1.0" in the front and .8" in the rear, it gives the Firehawk a more aggressive stance, lower center of gravity and delivers even more response and control during high speed cornering.

Flat Black Painted Larger Spoiler

To complete the Muscle Car theme, the new rear spoiler is painted flat black. It provides a higher lip to increase down force at high speeds. The dotted line on the photo at right shows the size of the stock G8-GT spoiler compared to the Firehawk spoiler.

All Firehawk content and systems affected by the Firehawk alteration are backed by SLP's 3 year/36,000 mile warranty.

Hood Graphics

To differentiate the Firehawk from the factory G8 GT, we've included a set of vinyl hood graphics that fade from black to clear giving the hood a more dramatic look towards the scoop openings. More cost-effective than airbrushing.
